## Cure analysis through quantum mono-pharmacists and homeopathy of a severe case of allergy

**Dr. Francisco Bulnes and MM Francisco H Bulnes**

### Abstract

A severe case of allergy and their total cure is analysed considering a definitive treatment on the base of quantum medicine actions realized to patients with similar symptoms of this allergy. The analysis is centered in the application of the corrective and restoring actions using quantum mono-pharmacists, which change the chirality of the vital field of the body disappearing, in a definitive way, the allergy effects, and symptoms yet when the sources of this allergy could follow present in the body, for example, follow consuming some foods that produced it.

**Keywords:** Correction action and restoring, chirality, helicity, quantum anti-histaminic action, quantum mono-pharmacists, distortion and deformation of vital field, immune system strengthening

### 1. Introduction

A severe allergy case of dermatological type was presented, apparently for eat some meals rich in A vitamin and fat acid- $\Omega 3$  and proteins like fish, milk and their derived and other with protein-complexes whose protein are heavy in the digestion and of nutritional assimilation.

In some cases, this symptom is related with a medical diagnostic on the fails of liver to process some feedings. We remember that the liver is the third organ of most importance after the brain and heart due to that produces the nutritional components and manufactures the red and white globules. Then the appearing of sufferings symptoms associated to the intake of food usually occurs when the liver is not work duly. The extreme cases are presented in certain illness as diabetes or hemochromatosis, where even exist sores and diabetic lower extremities. Although has been signed that the liver can be affected for the stress and the mental content in numerous cases during the intake of food <sup>[1]</sup>. However in some cases is not the type of condition, since apparently the liver is healthy but are presented anomalies in the skin.

A study presented on allergies <sup>[2]</sup> established that these are given in the deepest level of the human soma as body-mind liking considering aspects of the interaction of Psyche and Soma, which happen through a complex network of feedback, medication, and modulation among the central and autonomic nervous systems, the endocrine system, the immune system, and the stress system. All these systems are working in a quantum frequencies  $V_{1,2}$ , <sup>[3]</sup> compatible with the best mental state where the person is happiness and healthy in thoughts and customs.

Likewise, considering before, we can give actions through quantum mono-pharmacists that go routed to change chirality of soma and psyche. Likewise, in this context are produced chiral asymmetries as physical actors of sickness and organic anomalies <sup>[1]</sup>.

### 2. Deep Actions and Correction of Severe Allergies Cases with dermic manifestations

We analyze the some allergies due whose manifestation is dermic and involves some times infection or invasive bacteria for a hearing type, or pruritus type, which furthermore will produce another affectations and sickness.

Substances that can be allergenic due to certain meals ingestion are histamine and of other groups, which to certain organic conditions of the patient or feeding customs of this, generate reactions of the immune system, which could take an incorrect action derived of deformation of the vital field  $X$ , which has causes more deeper than the effects developed for other allergenic causes.

There are various allergy cases: One is when the allergy is created by an allergenic, which

provokes an immune system response creating the different allergy effects, which in general are visible. This a simplest case of allergy [3-6].

In addition, exist an allergy type, which is chronicle, and appear in certain time lapses without apparent causes. Much times, these allergy types have a born in the mind or for bad endocrinal system functioning.

The last of allergy types are the developed for reasons more complex. For example the weakness of immune system and some bad organ functioning as bad liver functioning vesicle and other, although in this last is typified an illness and

treatments are focused in this sense and no the cure of an allergy. However, a deepest analysis, for example from a point of view of the vital field and soma theories can be identified causes that comes from the charges, sources of mitochondrial complexes, where necessary mono-pharmacists that spill electrons or information between electrons like photons to revert and eliminate the collateral atomic damage.

Then a quantum medical action  $\mathfrak{S}$ , for eliminate the possibility of free radicals reproduction is given for [7-9]:

Also no exist coercive charges, since the actions showed in the figure give equal to zero. If we could have +1, the coercive charges could create dynamical protons and thus disorder in sickness. The appearing of the energy state  $\circ-$  is no exist electron here. Then a restoring action will be introducing a state  $\bullet-$  which says on the recovering of the particle. Likewise all have support in an electronic reticle of energy states  $\mathcal{M}_{0,1}$ , where are given the transitions of the energy states  $\circ-----\bullet$ , where path integrals  $I_{\alpha\beta}$ , along  $\circ-----\bullet$ , can be evaluated. Finally is created a microscopic or quantum wave  $\mathfrak{S}$ , of correct information (the cure).

A new perspective in biomedical engineering will be construct a device of the electronic type, which through the quantum and electronic frequencies spills a photon beam, in a direct way, on the affected body parte (see the figure 1) [10]. Likewise, actions as given in (1) and other can be established to different treatments.

energy, the change the polarity of the microscopic electromagnetism of body and the strengthening of the immune system and soma [11].

### 3. A Clinical Case

We have the following clinical case, which was presented with a severe dermic manifestation and an apparent histaminic intolerance of the organism of the patient Julio Ramírez [12].

Julio Ramírez presented symptoms of an allergy apparently for ingest of meals derived of the milk (such as cheese, milk, buttermilk and etcetera). The individual not presented these same symptoms with other feedings that could have the same constant component that is the histamine, for example, ingest of fishes, some dry fruits as nuts. This revealed a cause more deep of his allergy. However, is important remark that when the allergy of the patient was intense, also these mentioned meals intensify the allergy with dermic manifestation very severe (see the Figure 2).

**Fig 1:** Biomedical device of electronic nature for cure illness and sufferings spilling a photon beam.

**Fig 2:** Patient sample photograph in an arm of the dermic spots and pruritus in whole body due to the severe allergy (archives [12]).

Realizing some medical proves on the patient were obtained the following observations:

- A. Patient was realizing ingest of meals rich of histamine during much time, predominating in his feeding these meals on other meals with other vitamin characteristics.
- B. Habits of his feeding were in inconvenient horary doing that the organism could not assimilate adequately the nutrients of these meals.

However, now in this time, we have a homeopathy and quantum medicine as approximately to it. Both medicines have developed through principles the managing of the

C. Localizing and detection of coercive charges in the vital field producing change of the field orientation and weakness of the field (see figure).

The observation C), brings with it the weakness of immune system, since when there are coercive charges, these act in the vital field and the vital field is deformed changing its chirality and weakling its immune system which born from atomic state in the electrons inside the mitochondrial complexes of the cells.

Also was determined that had the existence a microbial component, possible a bacteria that lives in a natural way in our body in the dermis which to microscopic level was attacking to the immune system producing an excess of histamine in the body and other components as allergenic reaction to these meals.

However, the important point is not change the form as the body organism acts, that is to say, in the presence of certain allergenic the organism produce histamine and other components as natural reaction to equilibrate the chemical process and their derivation in all assimilation of meals. The change must be on the bacteria and its disordered reproduction, likewise as its actuation on the body organism, for benefit it.

Then is required an action as defined in (1). The correction will be realized through a monopharmacist that change the coercive charges from atomic level, changing the chirality of electron interchange and covalent links in mitochondrial complexes, provoking a change of behavior of the cells including the mitochondrial complexes.

However, the evidence more important that showed this case is that the immune system was weakness because the persisting of the allergy provokes that and the chirality showed this. Then actions joined with the chirality change of the body must be realized.

**3. Medical treatment and results**

First, the illness was treated as a simple allergy, then to the patient was applied a treatment with an anti-histaminic of large spectra for cure an enlarged allergenic included the histaminic origin. This was because the declaration of the allergy was presented after of the ingest of certain meals rich in A-vitamins, histamine and fat acid-Ω3 [6]. However, the effects of the allergy follow persisting, although temporally disappear during 3 or 4 hours, time of the maximum effect of the anti-histamines action. After, return

these allergenic effects with more force. Then was proceeded to apply another anti-histaminic with more short spectra, that is to say, more specific to the presented symptoms obtaining apparently a best response, because the symptoms disappear more long time, until 24 hours, however the medication had that be in intervals of 8 hours. However, the allergy no disappears, and increases the number of dermic manifestations and more pruritus in different parts of the body. Then the illness, until this point, was more than a simple allergy, because the symptoms of histamines are backed and the immune systems is seen compromised because the increasing of the pruritus and bad-being was the manifestation of it [12].

Using a radionics biomedical device of detection and lectures of the electromagnetic field was detected a low charge in whole body, taking the special points where the spots and pruritus is magnified [9].

The appearing of dermic bad-being and pruritus alerted on a bacteria, that in normal conditions is inoffensive and helps to elimination of some virus and toxins that acts in an external way; but in this case also acted on the dermic fabric in a negative form. Then the bacteria action is became in a toxic action presenting as dermic manifestations. Then we required a medical treatment on the base of eliminate the disordered reproduction of this bacteria in the dermic level and also in the immune system level to get back to its conditions of eliminate all external pathogen attack.

The medical treatment was based on the quantum actions given by homeopathic monopharmacists [12, 13]: *Urtica Urens* 30 cc, *Sulphur* 30 cc and *Arsenicus* 30 cc in the globulins modality, each middle hour alternating these.

The *Urtica Urens*, realized a typical homopathic action, because had the intention of provoke the immune system, alerting and doing it working, although eliminated the excess of bacteria, poised them. The intention of the medication of sulphur was correct the ph and realize an anti-histaminic action. For last, the *Arsenicus* poised to the bacteria and other possible organisms that could be filtered for the incorrect functioning of the bacteria when this no helped to the dermic cleaning [12, 13].

In a first week, was observed that the big dermic manifestations as spots disappeared, however the pruritus was intensified. The reaction was much seemed to poisoning, then was decided remove the *Arsenicus* and only treat to the patient with *Urtica Urens* 30cc and *Sulphur* 30cc.

**Fig 3:** Effectiveness treatments evolution along three months of homeopathic medicine. The graphs of histograms show the action per three homeopathic monopharmacists, their effectiveness per day, their efficient per day knowing their effects and the lines represent the behavior to cure. The Arsenicum 30 cc, was eliminate of the first treatment, finding the cure expressed in the increasing straight line in the second treatment [12].

The treatment was prolonged during three months eliminating for complete the allergy in its organic effects as well as dermic effects [7, 12].

After, for enforce the homeopathic treatment on the corrective action of the immune system the patient was treated with quantum medicine for the fixing of chirality of the vital field in the correct spin (direction) of the of electrons and their electronics layers that contents them. In this case, the correct digestion should be corrected. Thus, the patient was medicated with *Bervul* and *Histol*, after the homeopathic treatment [1, 8, 15]. The *Bervul* quantum mono-pharmacist was medicated with intention of return to the liver correct functions and all the digestive system, including the microorganisms that serve in the correct assimilation of the meals. *Histol* was medicated to gauge the electric charge system in the correct electric potentials eliminating the coercive charges or the lack of these potentials [16]. Furthermore, the quantum treatment [14] also had the intention of establish the correct involutive quantum Insights by quantum actions in preventive and corrective developments to future [17].

**The important result of this clinical case is the following**

**Statement 1:** In the body some times are established disorders and disequilibrium because the body change in its acid overload, that is to say, the right acid/alkaline balance or ph is incorrect because the memory of the cells has been loss due to the intromission of disequilibrium in the vital field, which depends of the atomic sources. Then applying a homeopathic mono-pharmacists can be awaken the memory of the cells where the immune system, which depends of the energy states of the body, awake for realize its functions of protection of the body. In the patient, possibly his ph, was changed and the living microorganism in the body forgot their regulatory and cyclic functions in benefit of the body and its organ systems. The homeopathy confront the immune system with these facts and obligate to the organisms to take their corresponding function. The quantum mono-pharmacist *Bervul* applied in the patient correct and restoring the organic system (in this case the linked to ingest of meals, the liver) recovering its correct balance. This is done with the photons spilled in the organism, obligating the cell renewal indispensable in the cyclic organic of the body, second to second, minute to minute, hour to hour, day to day and year with year, where the biometric and environment cycles take a place.

**Statement 2:** Here the important is to know that the homeopathy establishes a medical treatment in a similarity

class of duality relations [10] defined by  $H^1(A, B)$ , where the duality is to awake the immune system through the similarity relations of the homeopathic medications respect to the organism effects. Likewise, the second class  $H^2(A, B)$ , of the duality relations is obtained through the quantum mono-pharmacists, which establish duality relation in the vital field and body energy, changing the energy states of the field. Both treatments act in a deep form, their difference is the duality relation type and the velocity for correct and restoring the vital field. The homeopathy takes more time of its effectiveness (see graphs in figure 3).

**Fig 4:** Efficiency along of the two homeopathic treatments. This measurement was realized with the mean action for each mono-pharmacists during three months [12].

**Fig 5:** Decaying of coercive charges as muons and other fermions. The all-decaying curves are included in the blue are of a Fermi-Dirac distribution to *Bervul*. The physical modelling is given in *nm* versus *nJ* [7, 9, 18] of  $\epsilon_F$ . The effectiveness and efficiency of *Bervul* is high [9, 10].

Finally, we can give maintenance and the high protection level of the immune system with some nutrition supplements, which enrich of bio-photons the organism. This gives a 99% of benefit in the strengthening of the energy sources (mitochondrial complexes, atomic links etcetera) and as these supplements are metal-organic eliminate the voracious protons of electrons, given pass to the good nutrition and assimilation of the meals [19, 20].

**Nomenclature**

$X$  – Vital field.

$\mathfrak{S}$  – Action of the field.

$H^2(A, B)$  – Space of similarity relations of second duality.

$\mathcal{M}_{0,1}$  – Logic reticule to establish the binary codes and binary encoding of the evaluation the path integrals to along of strings, paths, trajectories and transitive graphs in the corrective and restorative actions.

$\epsilon_F$  – Fermi energy.

$\nu_{1,2}$  – Quantum frequency determined by  $\frac{E_{1,2}}{\hbar}$ . This is the frequency of the electron-wave (photon) when this pass from the level 1 to 2.

$I_{\alpha\beta}$  – Integrals of Field. Integrals of line used in the correspondence with the Feynman diagrams. For example, between two energy states of one particle,  $\phi_\alpha$ , and  $\phi_\beta$ , exist one infinity of trajectories that summed give the integral  $I_{\alpha\beta}$ .

$H^1(A, B)$  – Space of similarity relations of first duality.

○ — — — — — ● — Virtual edge of photon string graph (string diagrams used to represent binary codes)

○ —  $\phi(0)$

● —  $\phi(1)$

↔ — Quantum wave in the transmitting of cure codes from (binary codes from the energy states).

**Units and Abbreviations**

*nm* – Nano-meter.

*eV* – Electron-volts.

*nJ* – Nano-joules.

*nJ/nm* – Effectiveness

*cc* – Centesimal units of homeopathic mono-pharmacist dilution.
