Abstract

People develop warts after contracting the Human Papillomavirus (HPV) infection. A thorough evaluation is essential to treat warts effectively, especially when warts grow on sensitive areas, such as in genital warts or anal warts. In such cases, choosing effective treatments becomes crucial. It is even harder to treat warts when secondary infections like syphilis or complications such as anal fissures are present.

Conventional methods like topical use of salicylic acid preparations, surgical removal, laser treatment, or cryotherapy offer only temporary relief. The condition needs natural treatment that heals holistically. Hence, experts recommend homeopathy to treat warts using symptom-based homeopathic remedies for long-lasting wart removal. In this paper a case study is presents on successful of treatment 30-year-old male with anal warts, secondary syphilis, and a history of anal fissures using classical Homeopathy.

Keywords: Anal warts, secondary syphilis, anal fissures, human papillomavirus, homeopathy etc.

Introduction

Human Papillomavirus is a group of viruses typically caused by direct contact with infected skin or mucous membranes. Different HPV strains lead to various skin conditions such as common warts, flat warts, cutaneous warts, and plantar warts. Among these, certain HPV strains like HPV-6 and HPV-11 are known for causing anogenital warts, which spread mainly through direct contact. Once inside the body, these HPV strains may stay dormant and reactivate when immunity is low.

Warts are benign skin growths that occur on the skin caused by the human papillomavirus (HPV). They transfer between people through genital contact or by contact with surfaces in locker rooms, swimming pools, or other communal areas. Anal warts are small warts that can occur inside and around the anus. The condition is also called condyloma acuminata. Anal warts are a form of genital warts. Warts may occur on other parts of your body at the same time that you have anal warts. Genital warts in women may appear on the vulva, vagina, or cervix. Genital warts in men can develop on the penis, scrotum, thighs, or groin.

Sometimes, warts appear similar to other skin conditions that resemble warts, so accurate diagnosis is vital before choosing Treatment options.

Anal fissures are small tears in the anal lining that cause sharp pain and bleeding during bowel movements. Secondary syphilis, caused by direct contact with *Treponema pallidum*, spreads through the bloodstream, producing skin eruptions. Anal warts often occur without pain or discomfort. Other symptoms of anal warts are rare but can include itching, bleeding, or discharge from the anus. A person with anal warts may also feel like they have a lump in their anal area. When warts, located near the anal area, combine with fissures and syphilitic lesions, it creates a complex medical situation requiring individualized care and natural treatments.

Symptoms of Anal Warts

- Gentle bumps in or around your anus.
- Lumps of Light brown, yellow, pink or flesh-coloured may cluster together.
- Bleeding.
- Itching.
- Dripping discharge

Causes of Anal Warts

- Direct contact with the mouth, anus, penis, or vagina of a person infected with HPV.
- Multiple sex partners
- Immune system that is compromised by illness or medication

Case Study

Gender: Male

Age: 30 Years

In October 2024, 30-year-old engineer, contacted Dr. Vikas Singhal at Dr. Singhal Homeo, Chandigarh, through an online consultation. He had been suffering for over six months from painful warts located near the anal region, with itching, irritation, and difficulty sitting for long hours. He also had a one-year history of anal fissures and laboratory-confirmed secondary syphilis.

These skin conditions caused not only physical discomfort but also emotional stress and social embarrassment, affecting his overall confidence and well-being.

Conventional Treatment History

Before choosing homeopathy, Mr. Sharma underwent other treatments, including:

- Three doses of Benzathine Penicillin (I.M.) for syphilis
- Cryotherapy sessions to freeze and remove common warts

Despite these efforts, his symptoms persisted. Warts reappeared, and fissure pain continued. Frustrated by temporary results, he sought natural treatments to achieve long-term healing through Homeopathic Treatment for Warts.

Homeopathic Evaluation and Treatment

On 4 October 2024, a detailed evaluation was conducted by reviewing medical history, emotional state, and physical symptoms. The aim was not only to heal warts but also to control HPV activity and syphilitic infection naturally.

Selection of Individualized Remedies

Homeopathy emphasizes personalization. Every patient's individual constitution and HPV strains are studied before selecting remedies for warts.

The Treatment plan was designed based on classical homeopathy approach focusing on

- Boosting immune response
- Controlling HPV infection and syphilitic spread
- Healing fissures naturally
- Preventing relapse of viral warts

The prescribed wart remedies were dispatched on 19 November 2024, and the entire treatment was conducted online. The goal was to treat warts gently yet effectively, addressing the root cause rather than only the visible lesions.

Medicines Prescribed

- Medorrhinum 10m Once A Month
- Sulphur 10 M As Intercurrent Medicine

Response and Progress during treatment

- **22 January 2025:** The patient reported 70%

improvement. The size and number of warts decreased, and no new eruptions appeared.

- **4 February 2025:** 80% improvement, with relief from itching and fissure pain.
- **5 March 2025:** The warts were gone, lesions completely healed, skin health restored, and the patient felt "normal" again.

Follow-up remedies for warts continued briefly to stabilize immunity and prevent warts from recurring.

Outcome

By March 2025, full recovery from anal warts, fissures, and secondary syphilis was achieved. The lesions healed without scarring, and there was no relapse. Along with physical recovery, his confidence improved, and he resumed his normal work life comfortably. This case proves that Homeopathic Treatment for Warts can help is long-lasting results, even in complex viral and sexually transmitted skin conditions, without side effects or recurrence.

Key Insights

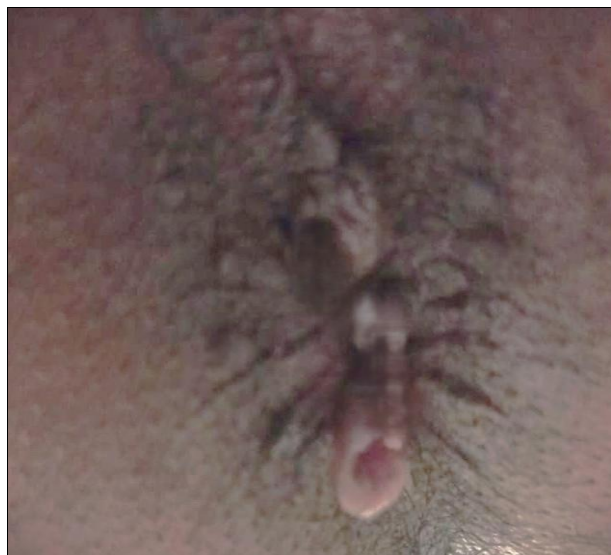

- Homeopathy addresses not only visible warts located externally but also internal viral tendencies and related HPV strains.
- Personalized wart remedies enhance the body's healing power and effectiveness in managing chronic infections.
- Home remedies for warts like good hygiene and dietary care, when combined with professional homeopathy, further support recovery.
- Compared to other treatments like surgery or cryotherapy, homeopathy provides safer, recurrence-free results.
- There is growing scientific evidence supporting the effectiveness of classical homeopathy as a natural approach to prevent warts and improve overall health.

Follow-Up and Present Status

As of November 2025, symptom remains free, with no new eruptions or discomfort. His immunity is stable, and follow-up home remedies continue for maintenance. He reports improved emotional health, restored focus, and confidence at work — clear indicators of holistic recovery.

Before Homeopathy Treatment

After Homeopathy Treatment

Conclusion

This case stands as a strong example of how Homeopathic Treatment for Warts and individualized remedies for warts can lead to sustained recovery, even when HPV strains cause recurring and complex infections. By combining home remedies for warts with constitutional therapy, homeopathy strengthens immunity, heals warts naturally, and helps prevent warts in the future. Though some people claim fast results from home remedies or quick-fix therapies, long-term recovery depends on internal balance and proper guidance. For anyone seeking natural treatments for common warts or complicated infections, homeopathy provides wart remedies that are both safe and deeply restorative.

Bibliography of Author

Dr. Vikas Singhal is a classical homeopath with over two decades of experience, treating patients from 70+ countries. His expertise in managing chronic viral and autoimmune disorders—including HPV-related and syphilitic infections—reflects the power of homeopathy as a holistic, natural system of healing. He is one of the best Homeopathic Physicians to treat acute & chronic, recurring, autoimmune, and resistant diseases in the Tricity and India. He is offering treatment for heumatoid arthritis, Ulcerative Colitis, Vitiligo, Ankylosing spondylitis, Psoriasis, Osteomyelitis, and various rare diseases considered incurable in other systems of medicines to Indian Patients and patients from different parts of the world. Dr. Singhal is known for his individualized, evidence-based approach to treatment. His commitment to evidence-based, classical homeopathic practice has earned him respect and recognition which also earned him several honors and awards for his selfless service to human being, he is the recipient of prestigious Bharatshri Award (2025). Dr. Singhal is a Life Member of leading professional bodies like the Indian Institute of Homeopathic Physicians (IIHP), Akhil Bhartiya Chikitsak Association (ABCA), Liga Medicorum Homoeopathica Internationalis (LMHI), and the Australian Homeopathic Association (International Allied Member Practitioner). He also an Honorary Physician to Tiny Tots Preparatory School, Chandigarh. Dr Singhal is an well known speaker at various national and International seminar and conferences.
